

SpayNeuterNac

PRE-OPERATIVE EVALUATION DOG

Date: _____ Owner: _____ Pet: _____ Pet ID#: _____ Evaluator: _____

CLINIC "TO DO" LIST

Surgery: (spay in heat pregnant high risk) (neuter crypt bicrypt)		Identification: (ID Collar photo chipped)	
Deworming: done Rx	Blue Tag: no yes	Yellow Tag: no yes	Rabies Tag: # _____ n/a
		City Tag: # _____ n/a	
Done During PreA Exam: (Rabies 1yr 3yr) (DHPP#1 DHPP#2 DHPP 1yr) (KC#1 KC1yr) (microchip) (HW Test fecal)		To Do While Anesthetized: (Rabies 1yr 3yr) (DHPP#1 DHPP#2 DHPP1yr) (KC#1 KC1yr) (HW Test fecal) (microchip tattoo) (remove baby teeth) (ear swab skin scraping) (IV fluids SC fluids) (additional surgery _____)	
Comments:		Vet Exam: OK for surgery	

TEST RESULTS (circle test if pending)

CBC Panel Lytes results attached	HW Test: Pos Neg	Fecal Direct: Neg Positive: _____
Skin Scraping: Demodex Scabies Negative		Fecal Flotation: Neg Hooks Rounds Coccidia Whips
(Ear Swab Oil: Neg Mites)	(Ear Cytology: Neg Yeast Bacteria)	Tapes Other: _____

DESCRIPTION

Asilomar Status (Shelter Animals): healthy treatable-rehabilitable treatable-manageable unhealthy-untreatable unclassified n/a

Breeds: Breed 1 _____ Breed 2 _____ **Patterns:** (badger bicolor brindle chestblaze harlequin mask merle saddle salt-pepper solid spotted tick tricolor tuxedo)

Color: Color 1 _____ Color 2 _____ Color 3 _____

Bite Status: has not bitten has bitten unknown **Health Status:** Healthy Minor Issues Moderate Issues Severe Issues

Normal Coat: (short medium long) (smooth curly wiry) (feathered thick thin corded hairless clipped)

Ears: (cropped notched R L tipped R L scarred R L missing R L) (erect semi-erect folded droopy long curled)

Eye Color: _____ **Tail:** none docked short docked medium bobbed long corkscrew kinked long curled

Collar: color _____ (cloth nylon plastic leather metal pinch metal choke chain)

Distinguishing Marks: _____ **Belongings:** _____

EXAMINATION In Computer

Check for ID	Tattoo: _____	Microchip Scan: none Number _____ Same as in record Date: _____
Temperature	_____ °F	_____ °F <i>normal – 100-102°F, flag >103°F</i>
Heart Rate	_____ beats per minute	Normals: puppy 80-220; toy dog 80-180; medium-large dog 70-160; giant dog 60-140
Respiratory Rate	_____ breaths per minute	<i>normal <40 per minute</i>
Weight	_____ Pounds	Flag BCS <3 or >7
Body Condition Score	1 2 3 4 5 6 7 8 9	1 – emaciated – ribs, spine, pelvis and bony prominences evident from a distance, no fat, loss of muscle.

- 2- very thin** - ribs, spine, pelvis easily visible, no palpable fat, minor loss of muscle mass.
- 3 – thin** – ribs easily palpated and sometimes visible, spine visible, no fat over the ribs, pelvis becoming prominent, obvious waist and abdominal tuck
- 4 – underweight** – ribs easily palpated with minimal fat covering, waist visible from above, evident abdominal tuck.
- 5 – ideal** – ribs palpable but not seen, waist seen from above, abdominal tuck seen from the side
- 6 – overweight** – ribs palpable through excess fat covering, waist not prominent from above, abdominal tuck seen from the side
- 7 – heavy** – ribs difficult to palpate, fat deposits at lumbar and base of tail, waist absent or barely visible, abdominal tuck may be absent
- 8 – obese** – ribs palpable only with very firm pressure, heavy fat deposits at lumbar and base of tail, no waist or abdominal tuck, may be pot bellied
- 9 – grossly obese** – large fat deposits over back neck and limbs, no waist or abdominal tuck, pot bellied.

Age Estimate	Juvenile: _____ weeks months	adult: young mature geriatric (flag)
	2-4 weeks - No teeth	4-5 months - Permanent incisors coming in, then premolars & molars
	3-4 weeks - Deciduous canines coming in	5-7 months - Permanent canines coming in, all teeth by 7 months
	4-6 weeks - Deciduous incisors & premolars coming in	1 year - Teeth white and clean
	8 weeks - All deciduous teeth are in	1-2 years - Tartar buildup and tooth wear begins
	3 1/2 - 4 months - No permanent teeth yet	Recessed gums often means geriatric
General Appearance	Excited BAR QAR Lethargic	Comments:
Temperament	Friendly Timid Frightened Aggressive-May Bite Aggressive-Complete Danger Cat Aggressive Dog Aggressive Cage Aggressive Food Aggressive Has Killed Animal	Comments:
Hydration	Normal Dehydrated: _____ % Flag if dehydrated	4-6% dehydrated: dry gums 6-8% dehydrated: loss of skin moisture, increased PCV/TS 8-10% dehydrated: sunken eyes 10-12% dehydrated: persistent skin tenting, dull eyes >12% dehydrated: weak pulses, lethargic
Muskuloskeletal	Lameness: RF LF RR LR none Comments:	Grade 1: lameness barely noticeable Grade 2: weight bearing, noticeable lameness Grade 3: sometimes carries the leg Grade 4: often carries the leg Grade 5: always carries the leg, non-weightbearing lameness
Skin	Fleas Ticks Normal Hair Loss Itching Skin Masses Sores Matted Fur	Skin Scraping Taken Capstar Blue Capstar Green Comments:
